DETAILED ACTION

1. This office action is in response to applicants' response filed on 03/29/2007.
2. Claims 1, 2, 6-32, 36-41 and 45-48 are pending.
3. Claims 3-5, 33-35 and 42-43 are cancelled.
3. Claims 1, 31 and 40 are amended.
4. Applicant's arguments with respect to the rejections of claims 1, 31 and 40 under 35 USC § 102 have been fully considered and are persuasive. Therefore, the rejections have been withdrawn. However, upon further consideration of the claims the following response is presented.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 7-10, 12-15, 17-20, 22-25, 32 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2, 7, 12, 17, 22, 32 and 41 recite "establishing the secure tunnel and the authenticating the user equipment with the network begin simultaneously" which is in conflict with "establishing the secure tunnel begins before authenticating the user and wherein during a time between a beginning of establishing the secure tunnel with one of

the network entities and a beginning of authenticating the user equipment with another of the network entities" recited by claims 1, 31 and 40 that renders the claims indefinite.

Claims 8-10, 13-15, 18-20 and 23-25 are indefinite because they are dependent from cancelled claims.

Allowable Subject Matter

1. Claims 1, 6, 11, 16, 21, 26-31, 36-40 and 45-48 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reasons for the allowance of the independent claims 1, 31 and 40 are the inclusion of the following limitations that are not found in the prior art and they are uniquely distinct features. The closest prior art Zhang et al (2002/0174335 A1) and Palekar et al (US 20030226017 A1). Zhang discloses a method for providing authentication, authorization and accounting (AAA) transactions in a wireless network. Zhang also discloses that a mobile terminal (MT) receives services from an Internet service provider (ISP) having an authentication server through an access point (AP) with a server. Palekar discloses an efficient method for establishing a secure communication between two endpoints such as a wireless client and a network entity, which consist of two phases of establishing a secure tunnel and authenticating the wireless client. Palekar further discloses that for the purpose of establishing the secure tunnel between the two endpoints either the authentication method is negotiated or the protocol used for communication

However, these two arts, singularly or in combination, fail to anticipate or render the following limitation:

“Claim 1, 31 and 40: communication during the time includes at least one of a request for an identification of the user equipment and a request for capability of the user equipment to support at least one data protocol.”

3. The dependent claims 6, 11, 16, 21, 26-30, 36-39 and 45-48 are allowed because they were originally found to include a unique feature not found in the closest abovementioned art.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Abdulhakim Nobahar whose telephone number is 571-272-3808. The examiner can normally be reached on M-T 8-6.
